"Mr. President, Ladies and Gentleme

This spontaneous visit is so much more greeable than a prepared one. It comes more directly from the heart of the people who participate, and I receive it as a greater compliment for that reason. I do not wish to be unduly impressible or superstitious, but, though we have outlived the days of the augurs, I think we have a right to think of some events as omens. I greet this as a happy and auspicious omen, that the first general greeting since the event of Tuesday is rendered to me by a venerable institution of learning. The thought has been abroad in the world a good deal, and with reason, that there is a divorce between scholarship and politics. Oberlin but there has been a sort of cloistered holarship in the United States that has stood aloof from active participation in public affairs, and I am glad to be greeted here to day by the active, live scholarship of Ohio, and I know of no place where scholarship has touched upon the nerve center of the public so effectually as n Oberlin. For this reason I am spec ially gratified for this greeting from ulty and the students of Oberlin

college, and its venerable and venerated lemen, for this visit. Whatever the sig ificance of Tuesday's event may be, i will be all the more significant for being immediately indorsed by the scholarship and culture of my state. I thank you, ladies and gentlemen, and thank your president for coming with you. You are

The truth was that the bontrol that was necessary and even indispensable in local affairs carried with it considerable influence into national affairs. With the help of two northern states the south could elect a president and be master of the government. We know for think we know that the power would have been exercised wisely, but the conquerors were not ready to be ruled even to their own advantage by the conquered. Now would the south have been if Grant instead of Lee had surrendered his army is years sluce.

Why should they? Business is good—money is cheap—every department of trade is overflowing. It is true that the currency is in an unstable condition, but a cool-headed citizen not in debt would not expect from the party which prostituted itself to Plaisted's and DeLamatyt's a better dollar than would be furnished by Chittenden, Morton and Sherman, and we may add that with eyes wide open to all its faults, the people north of the Potomac had come to the conclusion that there was better prospect of good government from the republican party than the word manufactures, the structure and memoracy, it is a bard fact that the seven means will be republican in speech, purpose and action. The republican president will apparently have at his back a republican congress. What they will the year of the southern states case to be pose sixed

The consequences that follow Tuesday's elections will be the dissolution of the solid sections now arrayed against each other. How, and by what means, this result will be accomplished will be manifested after the meeting of the new congress. The Appeal says: "The democrats have been badly beaten; they have suffered a complete Waterloo deleat. The assurances on which we built our hopes of success were as mountain sand, to be washed away in a night, out of sight, by the flood of republican votes. The solid south stands almost alone for democratic principles. The sections are more sternly defined to-day than they were in 1800."

After attributing defeat to the rousing of the passions and prejudices of the north against the south, the Appeal says: "The political victory thus secured cannot last longer than the admin istration that is the result of it. The best answer that the solid south can make to the gross libels that have won for the republican party, a fresh lease of power will be the devotion to its material interests and a strict maintenance of the credit of its municipalities and states.

For sixteen years he filled the office of judge of the court of ordinary, and in a manner entirely satisfactorily to the county in which he lived he discharged his duties. As judge of the Chattahooch e circuit, he has added to his reputation as a lawyer, and given evidence of the good judgment of the governor in appointing him. Of fine legal ability, genial in his intercourse with all, an upright, conscientious judge, the legislature will doubtless recognize his claims.

A good many changes are reported by wire in the next house of representatives some being favorable and some unfavor-able. They nearly balance each other, and leave the next house in the hands of the republicans. It still looks as if the ans would have a working ma rity of about ten.

THE result of the presidential election is not fully determined, because the Paonably certain that Nevada and ornia have gone democratic. cock's vote will therefore be: Dixie, 138: New Jersey, 9: Nevada, 3, and Cal-Barfield 212 electoral votes. If Oregon has chosen Hancock electors, Hancock will have 150 and Garfield 200 votes.

It is now safe to assume that Messrs Booth and Sharon will be succeeded by lemocrats in the senate. In that case ere will be in the senate after the fourth of next March, thirty-one democratic senators from the south, two from California, two from Oregon, one from Nevada, one from Indiana, one from Ohio and one from New Jersey-total thirty-nine, not including David Davis, and permitting Kellogs to hold a seat. Thirty-nine mocrats and thirty-six republicans, and if Kellogg is replaced by a democrat, and Judge Davis remains steadfast, the senate will in 1881 consist of forty-one demo crats and thirty-five republicans. This result may, however, be affected by the legislature of Tennessee: but it is difficult legislature of Tennessee; but it is difficult tingency be deprived of the control of the senate before 1883.

This arrangement and utilization so far as Georgia is concerned, will require the judgment of an expert, the discriminaon of a scholar, and the patience of an enthusiast, and an appropriation by the legislature is necessary to secure such result as would be creditable to the state. We most cordially indorse the suggestion of Judge Hook with respect to Mr. Charles C. Jones, Jr. THE CONSTITUTION has already singled him out as the one man fitted by training, experience and enthusiasm for the work of preparing a complete history of Georgia. Mr. Jones has already made an exhaustive study of the antiquities of Georgia, and his various publications relating to these and to the more interesting events of the colonial period are monuments of labo ious research, patriotic ardor and literary style. Mr. Jones's labors in this direction have given him less fame among his own people than among scientific men and specialists in the old world. In England, France and Germany, the high rank of his scholarship and the importance of his researches have long been acknowledged, and there records of Georgia into a history which shall take rank among the best productions of the most eminent scholars. We have written this, not for the p irpose of preparing a eulogy upon Mr. es, but for the purpose of calling attention to the importance of Judge Hook's suggestion

Dr. Felton and Ris Defeat We are not surprised at the wild en-husiasm with which the "organized" ocracy of the seventh district receive mocked them, defied them, and beaten them for the past six years. But we do not join them in the full extent of their joicing. We are glad that Dr. Felton en, because he has opposed the organization of the party we belong to. But in two bitter campaigns against him, in which we exhausted every honorable we have resource to beat him, found nothing to say against him except that his course tended to demoralize and undicipline the party on whose perfect discipline depended the salvation of

the country.

His record in congress has been that of a capable and patriotic man-his private life has been above reproachand his character high and guarded. The democratic party has suffered nothing from his service in congress and his district has had no complaint to make-he has served both faithfully and devotedly -and had he been sent there by his absolutely gave it up. As it is, he will be honored as a true and illustrious Georgian, when questions of mere party ex-pediency have been forgotten.

Governor Colquitt's Message It goes without saving, that we take great pleasure in printing Governor Colquitt's message to the legislature. It is Georgia. It is the duty of the state to just such a plain, practical, sensible message, as might have been expected from the governor. Every department of the state's business is discussed-every resource is set forth-and forcible suggestions are made on all points that need attention. The message gives assurance that we shall have just such another fine, faithful, common-sense administration, as the one just closing, and that under this wise and liberal influence Georgia

will grow in peace and prosperity. There breathes in every sentence that the governor has written the pleasing consciousness of a trust honestly administered, and a future full of ample growth and happiness. Georgians never had so much to congratulate themselves on, and the state never had such prospects. An empire state already in estimation and in history, it promises to rapidly become an empire in fact. There is development and expansion on every side-in every industry-in every sense. We could never afford so completely to snap our fingers at the rest of these United States, and turn ourselves

in upon our own resources, as at present. We need not say that the two years of Governor Colquitt's administration will put to rest forever the charges made against him in the heat of the campaign. He will show by his record that he is not, and has not been, and never can be, put under any sort of sinister influence, but that with singleness of heart and a perfectly free hand, he will serve Georgia as he has always done. He will retire from the singleness of heart and a perfectly free capitol at the end of two years enjoying more perfectly than ever the confidence of the people and the love of his constit

The only crumb of comfort for the democracy are the possible retention of the house of representatives and the defeat of John Kelly's man, Grace for mayor of New York city. The latter consummation is only a possibility, but we certainly hope Kelly, the insolent domineering head of the metropolitan hoadlums, has been expelled from power, turned out of office and reduced to the moral and political statue of a very inferior private citizen. It would be best for the construy, and certainly a brave deliverance for the democracy.

Cincinnati Gazette, rep. The party that is going to govern this nation is the party which puts itself in line with the leading thought. And that thought will not be the sectional polities of a coerced solid south, ruled by an o'd bourbon oligarchy, having a party of fag enders in the north. It will not be the party which makes its leading policy the fostering of provincial jealousies and, sectional antagonisms, and who e fundamental principle is that a part of the people is greater than the whole. All this provincialism belongs to primitive tribes. As people develop civilization they become national in feeling, and as they become national liberty is developed. Having suffered for about twenty years with severe disease of the kidneys (which our local physician prenounced Bright's disease) I made a journey East to consult the eminent Dr. Haven, of Hamilton, New York, of whose farme in this specialty I had heard much. Dr. Haven examined me carefully, and simply said: 'Go and get a bottle of Huxr's Remeny and take according to directions.' After having traveled so far for treatment, it struck me as rather funny to be directed to take a medicine which I might have bought within a stone's throw of my own door, but I was in the doctor's hards, and of course I followed his advice, and before I had taken Huxr's Remeny half a dezen times I found immense benefit from it, and by continuing the use of it for a limited time I recovered from my trouble entirely, and am to-day. I think, one of the most rugged of rugged of Michiganders. The world is indebted to you, sir, for the promulgation of such a medicine, and I hope you may not go without your reward."

Whilst the politicians on both sides are in continual strife, the boom of progress is conducted by "The merchant prince," John Ryan, who, being alive to the interests of his customers, and by his close attention to the sales of the eastern markets, has secured immense drives in Carpets, oil Cloths, etc.

tive Reporter.

Whoever has heard of Atlanta has probably heard of John Ryan, its great merchant prince, whose business has assumed proportions of tremendous magnitude, and at times reaching even into the territories. But few, however, realize the real greatness of this mighty dry goods establishment. inless, like the editor, they have gone through it in detail. So we conclude to give our readers an idea of what we saw. Pressing in at the Whitehall street front (the building runs from Whitehall through to Broad), we elbow our way through the crowds of shoppers to the rear, and stop for observation. We are on the ground floor whese every conceivable thing in the dry goods line is round about us. The large building has four stories, the basement being devoted to shoes and wholesaling. The second or ground floor is the general salesroom where hundreds of ladies may be seen at a time. On the third floor is the dressmaking department, and the reader can well imagine how our eyes dilated on seeing forty or fifty wemen engaged in mantua and dress making. The thought at once struck us that John Ryan's is not only a mighty business establishment, but a bethrough it in detail. So we conclude to

struck us that John Ryan's is not only a mighty business establishment, but a benevolence besides in furnishing so many women with profitable work. On the fourth floor some ten or a dozen carpet makers are at work upon the goods purchased from the splendid carpet departement of the house. The conclusion forced itself upon us that there must be at least 150 employes in the establishment, which is perhaps the largest number employed in any one southern house.

John Ryan's popularity springs from various causes, among them his low prices and great bargains which he is enabled to offer through shrewd purchasers for cash, of which he has an almost unlimited supply. Then his one price system is exceedingly attractive to ladies, who know at nee that the goods are offered at the lowest market price.
